

List of Tables

Table 2.1.1 Stream length and density for each county in the SAA region except for Virginia city-counties.

Table 2.1.2 Hydrologic unit watersheds that are fully or partly within the SAA region, grouped by major drainage basins.

Table 2.1.3 Water surface area of flooded rivers and lakes in the SAA region.

Table 2.4.1 Threatened, endangered, and special concern species in the SAA area.

Table 2.5.1 Summary statistics for trout in the SAA.

Table 2.5.2 Reservoirs in the SAA area greater than about 500 acres (about 1 square mile) with trout.

Table 2.6.1 Other aquatic species in the SAA area.

Table 4.1.1 A summary of statutes that have included provisions for the protection or maintenance of water quality.

Table 4.1.2 A summary of SAA state water quality laws including Best Management Practice programs.

Table 4.2.1 Federal assistance programs for aquatic resource improvement in the SAA area.

Table 5.1.1 Length of stream within 100 feet of graveled and light-duty paved roads for 20 counties in the SAA region with potentially high road impacts on water quality.

Table 5.1.2 Land use activities and their potential effects on watershed hydrology.

Table 5.1.3 Interaction of watershed hydrology effects with aquatic organisms.

Table 5.1.4 Fish consumption advisories in the states within the Southern Appalachian Assessment area.

Table 6.1.1 Total water use in the SAA area in million gallons per day from 1985-1990.

Table 6.1.2 Total water use in the SAA for thermoelectric cooling during 1985 and 1990 (million gallons per day).

Table 6.1.3 Water use by county for hydroelectric power in million gallons per day in 1990.

Table 6.1.4 Water use in million gallons per day for each county in the SAA area by commercial, domestic, industrial, and thermoelectric categories.

Table 6.1.5 Total freshwater withdrawals in million gallons per day in the South, 1960-1985, with projections of demand to 2040.

Table 6.1.6 Total freshwater consumption in million gallons per day in the South, 1960-1985, with projections of demand to 2040.

Table 6.2.1 Water use estimates on National Forest System land based on Water Use Rights Records (WURR).
